EYESTRAIN FROM COMPUTERS?

Are you 16-40 and have eyestrain or headache from computers?
Our research may improve comfort, accuracy & productivity

- In our study, you will be given a free detailed eye examination to find causes of eyestrain
- We will provide a report describing solutions
- We will tell you whether you are eligible for a clinical trial later in the year of new glasses for computer eyestrain. If suitable, you would receive these free of charge.

For more information, please contact:

Dr Robert Yammouni & Professor Bruce Evans
